Standard Manifestation Designs*

Our collection of standard manifestation designs provide the ideal, cost-effective solution for making large areas of glass apparent.

Lines, squares, dots and hexagons positioned at uniform spacing provide the contrast required to satisfy both Health & Safety legislation and correct Disability Discrimination Acts requirements.

All of our standard designs are suitable for production using any of our vinyl range including etches, frosts, crystals and over 40 solid colours.

We can supply and install or provide strips of pre-spaced materials fully ready for self application.

If you would like something more bespoke consider using lettering, logos, a mixture of shapes or another combination to your requirements.

*All of the above designs are scaled to 50mm high and spaced at either 100mm or 125mm centres. Other combinations are available.
